CPV FAIRVIEW

CPV Fairview is a 2X1 combined cycle power generation facility. The project will be comprised of two state of the art, high efficiency natural gas-fired GE 7HA.02 combustion turbine generators coupled with two heat recovery steam generators with duct firing, and one GE steam turbine driven generator.

DETAILS

LOCATION	Johnstown, PA
OWNER	Competitive Power Ventures
TYPE	Combined Cycle, Natural Gas
FACILITY SIZE	1050 MW
NERC REGION	RF
