

## **MAINTENANCE & CONSTRUCTION**

# **INDUSTRIAL SERVICES**

We offer comprehensive maintenance and construction services to the power, oil & gas, petrochemical and industrial sectors. We maintain offices and fabrication capabilities in Houston, Texas; Sulphur, Louisiana; and Weldon, North Carolina.

We provide plant upgrade, maintenance and turnaround planning and execution to optimize efficiency and minimize downtime. We offer greenfield services as well to ensure new projects are completed on time and within budget.

We support capital projects, turnarounds, routine and emergency maintenance projects. We respond quickly to your emergent situation with a topnotch team of qualified pipefitters, welders, riggers, boilermakers and required support personnel that address the following:

- Pipe fabrication & installation
- Specialty alloy welding (R & S stamps)
- Concrete installation
- Structural steel erection
- Full service maintenance
- Heavy-lift rigging

- Emergency shutdowns
- Equipment assembly & erection
- Field service
- Modular unit fabrication & assembly
- Boiler & furnace erection and repair
- Site preparation
- Civil foundations

For each project, we customize an individual quality assurance program, conducting a series of installation, inspection and quality audit reports to ensure efficient monitoring of processes.

We are fully committed to the health and safety of our employees and contractors, routinely conducting safety meetings and audits as described in the NAES Safety Management Program.
